How Will It Be Used?

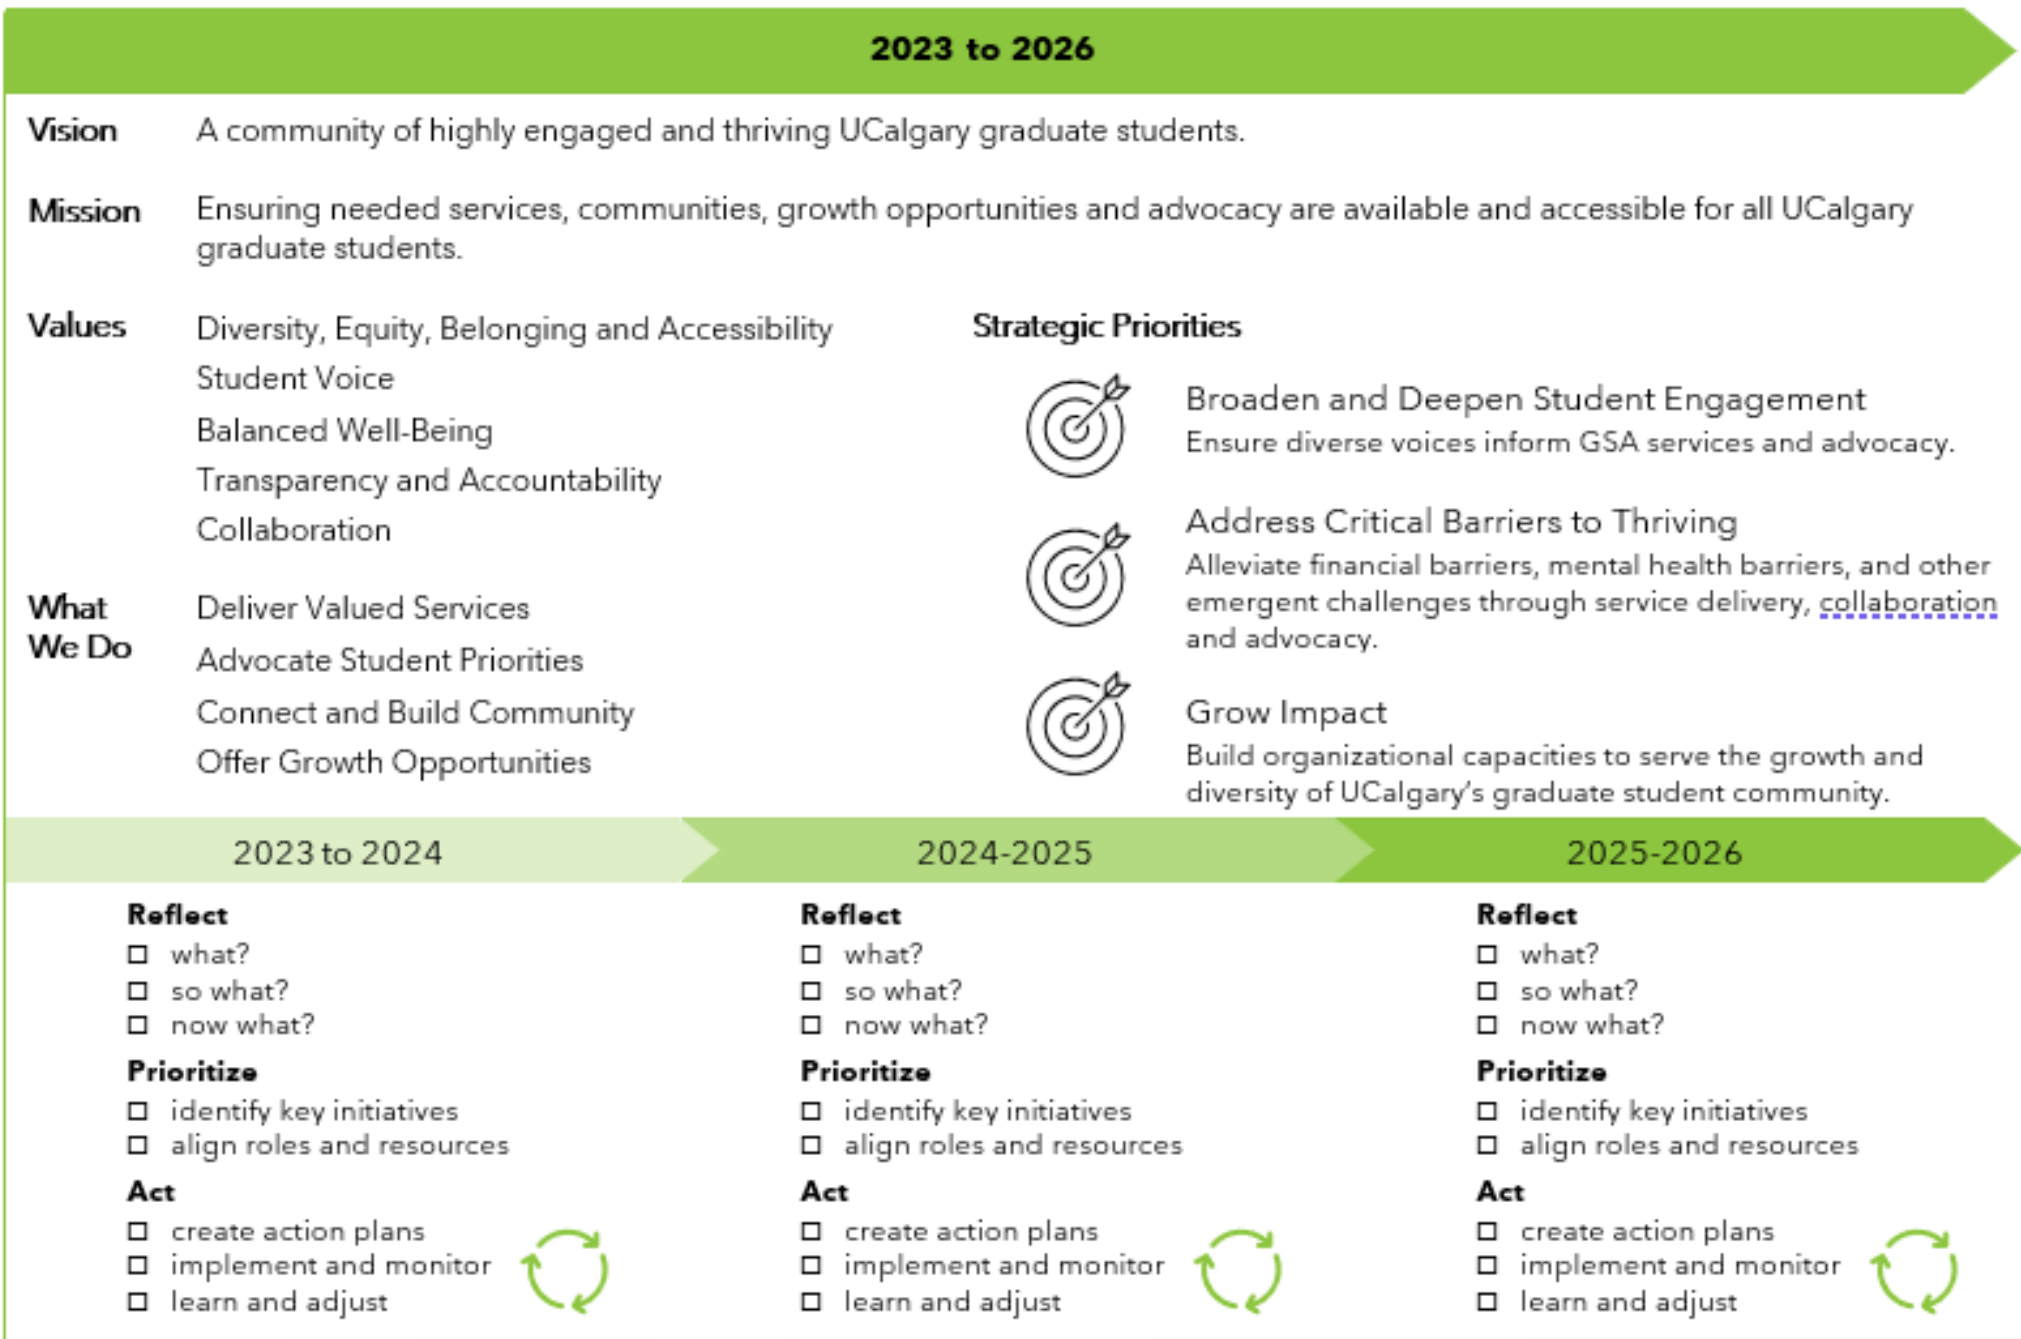

Strategy Document

Strategy is about a wide set of issues and what is needed because of those issues.

A strategy document should serve as a frame for decision making.

It should help you screen out what you won't do, prioritize what you will do, and how.

An iterative process to plan what the GSA will accomplish towards its strategic goals and values each year.

Reflect

What?

- Q. What worked well in achieving priorities and values?
- Q. What did not work as well as expected? What still needs to be addressed?
- Q. What do we know about current student priorities? What is changing and staying the same?

So What?

- Q. What sense do we make of this information?
- Q. What do we want to achieve to advance priorities and values?

Now What?

- Q. What initiatives might help and which should we prioritize?

Small Group Conversations

- Q1. Does this guiding document capture what YOU expect from the GSA as a graduate student and GRC member?
- If yes, how?
 - If no, what is missing?
- Q2. Are the values appropriate and essential for guiding the GSA's conduct, its decision making, and what it works towards?
- Please comment on why or why not.

Next Steps
